

- 5** • Inserte boquilla en la abertura con los pestillos hacia arriba

- 6** • Perfore membrana con herramienta de boquilla
• Gire el tornillo de retención de la boquilla en dirección de las manecillas del reloj para asegurar la boquilla en su lugar
• Precaución: El apretar demasiado el tornillo puede causar que la boquilla reviente

- 8** • **Importante:** Purgue línea lateral antes de reinstalar ensamble interior
• Inserte ensamble interior

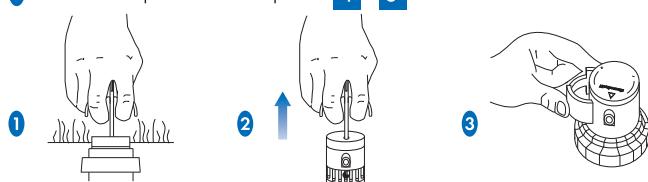

Ajuste de Arco

- 1** • Con una mano sujeté el tubo de flujo debajo de la sección ribeteada
2 • Con la otra mano gire la torreta para localizar los puntos de paro del arco

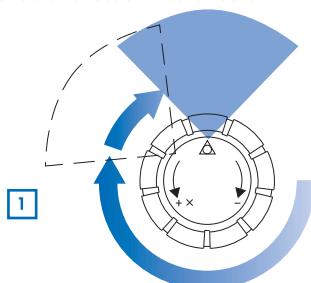

Inserción de Boquilla después de instalación

- 1** • Con una mano inserte herramienta de boquilla en la parte superior del aspersor y gire 90°
2 • Jale hacia arriba para revelar la cabeza del aspersor
3 • Con la otra mano inserte el sujetador de cuello opcional
4 • Instale la boquilla basado en pasos **4 - 5**

Ajuste de arco después de instalación (ajuste en mojado)

- 1** • Ver **1** y **2**
2 • Para ajustar tamaño de arco ver **7**
• Para aumentar el arco gire la torreta en dirección + de la flecha. Para disminuir el arco gire la torreta en dirección - de la flecha

148-278 R1

CT 70

• Preset rotation angles: 90° 180° 270° 360°

Nozzle performance chart

Nozzle	PSI (BAR)	Flow GPM (M³/HR)	Max Radius FT. (M)
71	40 (2.8)	8.1 (1.95)	49 (14.9)
	50 (3.4)	9.1 (2.23)	51 (15.5)
	60 (4.2)	10.0 (2.45)	53 (16.2)
	70 (4.8)	11.0 (2.70)	55 (16.8)
	80 (5.5)	11.8 (2.91)	56 (17.0)
72	50 (3.4)	10.7 (2.43)	54 (16.5)
	60 (4.2)	11.8 (2.68)	55 (16.8)
	70 (4.8)	12.6 (2.86)	57 (17.4)
	80 (5.5)	13.8 (3.13)	58 (17.7)
73	50 (3.4)	14.0 (3.18)	57 (17.4)
	60 (4.2)	15.3 (3.48)	58 (17.7)
	70 (4.8)	16.8 (3.82)	60 (18.3)
	80 (5.5)	17.8 (4.04)	61 (18.6)
74	60 (4.2)	16.6 (3.77)	59 (18.0)
	70 (4.8)	18.1 (4.11)	62 (18.9)
	80 (5.5)	19.2 (4.36)	63 (19.2)
	90 (6.2)	20.4 (4.63)	65 (19.8)
75	60 (4.2)	22.5 (5.50)	66 (20.1)
	70 (4.8)	24.7 (5.61)	67 (20.4)
	80 (5.5)	26.5 (6.02)	72 (21.9)
	90 (6.2)	28.0 (6.36)	74 (22.6)

Maximum operating pressure 90 PSI (6.2 Bar)
Radius of coverage shown is for still air with no diffusion. Derate for wind.

Installation

- 1** • Set sprinkler no lower than flush to grade

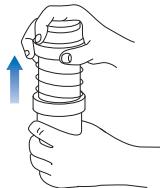

Sprinkler head setup before installation in ground

Nozzle installation

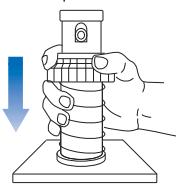

- 1** • Unscrew top from tube

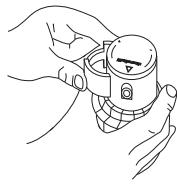

- 2** • Remove inner assembly

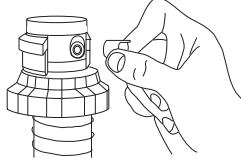

- 3** • Place inner assemble on flat surface
• With one hand push down cover

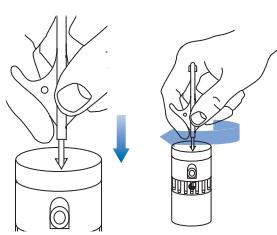

- 4** • With other hand snap on collar support

- 5** • Insert nozzle with ears up into nozzle opening

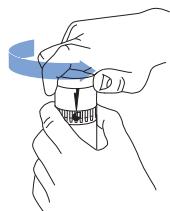

- 6** • Pierce membrane with nozzle tool
• Rotate nozzle retaining screw in the clockwise direction in order to lock the nozzle in place.
• Caution: Overtightening screw may cause nozzle blow out

Arc adjustment

- 7** • With one hand hold ribbed section
• With other hand rotate turret to adjust arrow to arc angle
• Arrow located opposite to nozzle
• Set rotation angle to 40° - 360° or
• Presets: 90° 180° 270° 360°

- 8** • Important: Flush lateral line before reinserting inner assembly
• Insert inner assembly

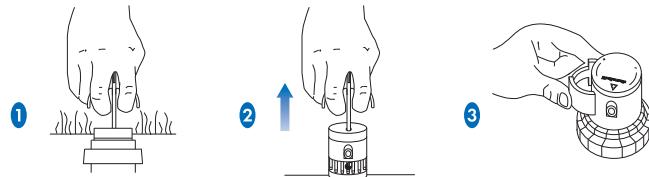

Arc location adjustment

- 1** • With one hand hold flow tube below ribbed section
2 • With the other hand rotate turret to relocate arc stop location

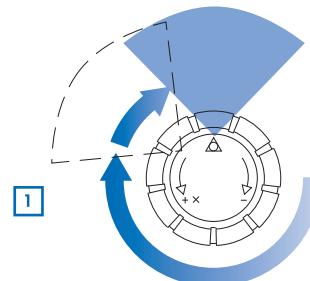

Nozzle insertion after installation

- 1** • With one hand insert nozzle tool into top of housing and rotate 90°
2 • Pull up to reveal sprinkler head
3 • With other hand snap on optional collar support
4 • Install nozzle based on steps **4** - **5**

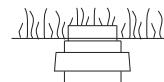

Arc adjustment after installation (wet set)

- 1** • See **1** & **2**
2 • To adjust arc size see **7**
• To enlarge the arc turn the turret in the direction of the + arrow. To decrease the arc turn the turret in the direction of the - arrow.

Instalación Español

- 1** • Instale el aspersor a nivel de suelo

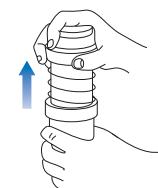

Preparación del aspersor antes de la instalación en el campo

Instalación de Boquilla

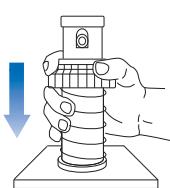

- 1** • Desenroscar parte superior

- 2** • Remueva ensamble interior

- 3** • Coloque ensamble interior en superficie plana
• Con una mano empuje hacia abajo el cuello

- 4** • Con la otra mano inserte collar de soporte de cuello
